Boutwell, Owens and Company, Inc. continues to invest in the future

In the past ten years Boutwell, Owens and Co., Inc. has invested in the following equipment:

2004 Boutwell Purchases New Tandem Diamond Press!

Boutwell, Owens & Co purchased a new Mitsubishi Tandem Diamond Litho press which is configured to run 9 colors front and one color back with a variety of coatings including blister and UV coatings. The press has the capability to inter-station cure UV printing, and is equipped with a cartridge inking system and automatic blanket washers and plate changers.

2003 Boutwell, Owens & Co., Inc. purchases a New Bobst 104ER Diecutter

A new Bobst 104ER diecutter was purchased to enhance our blanking capacity and improve our overall diecutting capacity.

2003 Boutwell, Owens & Co., Inc. purchases a New Bobst Alpina folder gluer!

A new Bobst Alpina gluer was purchased with an integrated auto-packer and auto-feed unit to maximize the production capabilities of Boutwell on high volume runs. This gluer is equipped with automatic glue detectors and automatic bar code scanners for the optimum in control.

2000 Boutwell Purchases new High Speed Window Machine

A new Kohmann window machine was added to improve dramatically our capability to manufacture stretch pack packaging and window cartons. This machine has the ability to be retrofitted for pick and place windows and can be configured for multiple streams and perforated window application.

1999 Boutwell Purchases New Press!

Boutwell, Owens & Co purchased and begins installation of Mitsubishi's newest 840 Press. Boutwell purchased a new press, its 840 series, which is configured to run 7 colors front and one color back and to blister coat in-line

Boutwell Purchases new Right-Angle Gluer

Boutwell purchased two International Speed Queen right angle gluers to enhance its growing fleet of glue equipment. These gluers provide the very best in right angle economies, and set-up flexibility for the most demanding and complex jobs.

Boutwell purchases Iberica

Boutwell purchased the Iberica blanking diecutter to enhance its higher volume sheet runs, reducing the need to manually strip product out, while improving run speeds and minimizing set-up times.
